

MethylDetox Profile

Before the test:

Do supplements need to be discontinued prior to having the MethylDetox Profile?

There is no need to discontinue supplements or make any dietary changes prior to this test. Supplementation and dietary intake would not impact the genetic test components assessed in the MethylDetox Profile.

Are these tests covered by health insurance?

No. Insurance plans do not reimburse for the MethylDetox Profile, currently.

Do I need to test through a healthcare provider, or may I test on my own?

You may test through a healthcare practitioner, directly through www.previmedica.com/, or one of our program advisors at PreviMedica. A blood draw provided by a medical professional is required. We can assist you with arranging a convenient option for you. You may also take part in our additional support programs.

After the test:

How long will it take to receive my results?

MethylDetox Profile test results are available online within 5-7 business days after the specimen is received in the laboratory. For tests ordered through a practitioner, results will be provided to the patient, by the practitioner.

How much support is available after testing?

With every test offered by Cell Science Systems, the patient and/or ordering practitioner may be eligible to receive a complimentary 30-minute phone or video consultation with a member of our support team to discuss test results.

To request an appointment for a complimentary session, please complete this form:
